

# Angela Forero Diaz

Geologist / Veterinarian / Agro-Industrial Engineer

"Passionate Entry-Level Geologist".

I'm an enthusiastic entry-level geologist with a penchant for taking initiative and embracing new challenges. My journey began with a university degree in veterinary medicine, which led to over 10 years of valuable experience in Colombia's veterinary field. However, my passion for exploration and understanding the Earth's subsurface prompted a career transition into geology.

Currently, I'm on the lookout for a geologist position to kickstart this exciting new chapter in my career. My goal is to leverage my skills, knowledge, and collaborative spirit to explore and understand the Earth's subsurface, ultimately contributing to the effective management and development of subsurface resources.

I'm driven, determined, and eager to combine my veterinary background with my geological expertise to make a positive impact in the field. Let's connect and explore the possibilities of working together for a better understanding of our planet's subsurface resources.

## Education

2017 - 2020

**M.Sc. Geological Engineering Department of Geology and Geophysics University of Bucharest.**

**Thesis:**  
Structural and stratigraphic influence on the distribution of hydrocarbon in reservoir rocks of an area in the central North Sea: Volve field, Norway.

2014 - 2017

**Geologist  
Department of Geology and Geophysics  
University of Bucharest.**

**Final Work:**  
Sedimentological study of Miocene-Pliocene deposits of Eastern Carpathians, Curbura zone. Depositional systems and tectonic evolution.

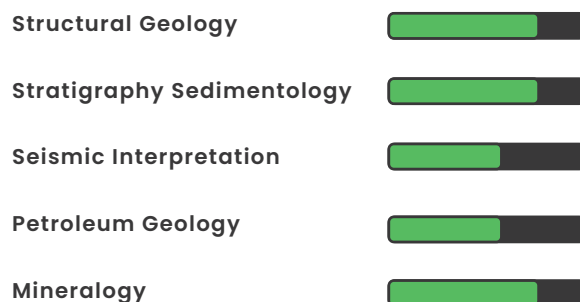

## Other Studies

2003 - 2009

**Veterinary Medicine**

Universidad Antonio Nariño Colombia

## Skills

## Languages

Spanish (**native**)

English

Romanian

Italian

Norwegian (**learning**)

## Work Experience

Currently looking for a work opportunity that allow me to start in the development of my career as geoscientist.
